EXPERIENCE

[Bitquintet](#) — *Frontend Developer (Remote)*

May 2025 - Present

Developed responsive applications with **React.js**, **Next.js**, and **Redux Toolkit**. I built **Inventory POS**, **Token Collection**, and **Live Score Update** projects.

[IIUC Transport App](#) — *Frontend Dashboard*

Jan 2025 - Part-time

Developed the **University Transport Management Dashboard** using **React.js** and **Next.js**, enabling efficient management of routes, vehicles, and schedules.

SKILLS

Tailwindcss | Javascript | Typescript | Reactjs | Redux | Nextjs | React Native | Jest | RTL

PROJECTS

Inventory Pos **Description** : Inventory POS System is a role-based app for managing products, stock, sales, orders, and warehouse/store operations with fast checkout, stock updates, due/credit handling, daily stock submission and reporting.

Technology Used : Nextjs, Tailwindcss, Authjs

[Live website](#) || [Doc & Github](#)

IIUC Transport **Description** : Developed the RBAC-based Transport Management Web App frontend of a university's official transport management system and features from scratch using React, TypeScript, Next.js, featuring real-time bus tracking, schedule updates, and a lost & found feed used by 8,000+ students.

Technology Used : Next.js, Tailwindcss

My role: frontend (admin panel)

[Live website](#) || [Recognized by IIUC](#)

Learning Portal **Description** : login system, assignments, quizzes, student leaderboard admin dashboard. Admins can add videos, assignments, and quizzes, edit, and delete them

Technology Used : React.js, Redux toolkit, RTK query, JSON server
